“According to the Centers for Disease Control, more than 75% of employers’ health care costs and productivity losses are related to employee lifestyle choices.”

Your employees are people just like you who need to be healthy, energetic and productive ... so what can you do to make this happen?

“According to the Centers for Disease Control, “Change the lifestyle and you will fix the problem ...” “The present economic crisis is an opportunity for every one of us to do some soul searching and make some very fundamental changes about how we lead our lives.”

“Employers have a real opportunity to start managing consumption and curbing health-care costs through consumer-directed health plans and other wellness and care-management programs,” said Tommy G. Thompson, former secretary of Health and Human Services.

## ■ **Goal:**

- Improve physical and mental health of employees.
- Reduce health care claims.
